

Dr Alexis Stockwell

Alexis's career has spanned over 25 years working in Australian and international health care systems across government, university and commercial settings in clinical, policy, academic and executive leadership positions. She currently works for the Johnson & Johnson Family of Companies, as the Queensland Lead for Health Service Development and Innovation and Partnership.

Alexis has outstanding strategic business development and leadership acumen, is politically astute and has financially managed multimillion dollar budgets. She has a successful background in strategic planning, large scale change management and corporate governance in complex highly regulated environments. Alexis's experience includes implementing innovative funding models such as pay for performance, commercial healthcare market strategy, customer and supplier analytics, government relations, pharmaceutical innovation, legislation impact reviews, and formalising partnerships with public and private sectors.

The breadth and depth of Alexis's expertise within health care systems enables a detailed understanding of how to successfully manage and navigate health system based challenges including partnership negotiations, private market business analysis, legislature reform, government reform agendas for state based and primary health sector health systems, workforce developments and the impact of changing socio-demographics.

Alexis has strong commercial awareness and is able to undertake fast and accurate risk and opportunity assessment using large data sets, financial reports, policy analysis, and environmental scanning. Her strength is being able to translate her insights from diverse sources into market and business intelligence to drive actionable strategy development. Alexis has a strong forward focused vision and uses her knowledge of society, politics and digital innovation to articulate the future health care horizon.

Alexis holds academic qualifications in Nursing, Social Work, Public Health and a Doctorate in Health Service Management (Pay for Performance, Economics, and Clinician Attitudes)
